## News Release

### GateHouse BGAN Customer Achieves Inmarsat Type Approval

**The Singapore-based satellite terminal manufacturer, Addvalue Communications Pte Ltd, is the second of GateHouse's BGAN protocol stack customers to achieve Inmarsat's Type Approval**

In developing BGAN user terminals for the Inmarsat Broadband Global Area Network (BGAN), Addvalue makes use of the GateHouse BGAN protocol stack. Following Addvalue's contract with Inmarsat to develop a class 3 BGAN user terminal, GateHouse and Addvalue have integrated and tested the protocol stack on Addvalue's user terminal, Wideye Sabre 1. Recently, the terminal has achieved the Inmarsat Type Approval and is now available on the market.

Business Unit Director Claus Krohn Vesterholt states: "The Addvalue BGAN terminal, Wideye Sabre 1, is a significant product for the BGAN market. It is the most cost effective BGAN terminal seen so far and yet able to provide IP data transfer rates up to 384 kbps. With this terminal Addvalue and GateHouse have proven that the BGAN technology can be integrated into a compact product and provide BGAN users with a cost-efficient satellite communication capability supported by a wide range of Addvalue's accessories to enhance users' experience.

As the only independent provider of software for Inmarsat's Broadband Global Area Network (BGAN) satellite terminals, GateHouse has achieved a central role in the market for satellite communications. The Type Approvals for two of our clients – first Hughes Network Systems and now Addvalue – confirm our unique position in the market."

#### About Addvalue Communications Pte Ltd

Established in Singapore since 1994, Addvalue Communications Pte Ltd, a wholly owned subsidiary of Addvalue Technologies Ltd, is a leading one-stop digital, wireless and broadband communications technology products innovator, which provides comprehensive satellite communication solutions, tracking and telemetry communications solutions and digital wireless design services for customers and business partners which include global leaders in the communications, information technology and electronics industries. Addvalue Technologies Ltd is listed on the Main Board of the Singapore Exchange (symbol: addvaltech). Addvalue Technologies Ltd web site is: [www.addvaluetech.com](http://www.addvaluetech.com).

#### About GateHouse

GateHouse offers a large range of technical software products – mainly within satellite communications and asset tracking (e.g. surveillance of vessels) – and consultancy services

ranging from full turnkey operation of software development to specified test operations. In addition, GateHouse is involved in the defence market. To ensure top quality and continuous improvement in software development, GateHouse works with CMMI and is ISO 9001:2000 certified.
